DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claim 1-40, drawn to an optical device, classified in class 349, subclass 17.
- II. Claims 41-42, drawn to arithmetic logic unit, classified in class 349, subclass 17 .

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because at least one opaque substrate can be used. The subcombination has separate utility such as in a cache or memory circuit, register circuit, neural network or other.

Because these inventions are distinct for the reasons given above and the search required for Group I in class 250 is not required for Group II, and the search for group II in subclasses relevant for ALUs in class 708 is not required for group I, restriction for examination purposes as indicated is proper.

Art Unit: 2871

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
